RE: Eco Stone Construction

To Whom it May Concern,

This letter is prepared for the acknowledgement of the outstanding performance by Eco Stone Construction on many Joint venture projects with our firm. Bryan Bergman and John Graff, the principals of Eco Stone, have participated as a partner in several national roll-out projects with us and have performed/managed work across all 16 divisions. We have found Eco Stone's performance to consistently be professional, timely and with a high standard of quality. Our clients are nationally recognized brands that have expected high quality, speed and competitive pricing. We continue to deliver excellent projects for our clients and Eco Stone has been a significant partner in our efforts. I highly recommend Eco Stone Construction as an outstanding General Contractor.

Sincerely,

Jim Hanrahan

National Director
